

These are the extensions we needed to install to run GradSchoolZero project.

astroid==2.8.2

black==21.9b0

click==8.0.3

isort==5.9.3

lazy-object-proxy==1.6.0

mccabe==0.6.1

mypy-extensions==0.4.3

pathspec==0.9.0

platformdirs==2.4.0

pylint==2.11.1

PyQt5==5.15.4

PyQt5-Qt5==5.15.2

PyQt5-sip==12.9.0

regex==2021.10.8

schedule==1.1.0

toml==0.10.2

tomli==1.2.1

typing-extensions==3.10.0.2

wrapt==1.12.1

We used Python and pyqt5 for the graphical interface.

To view the code

1. We need a python ide like PyCharm
2. Python has to be installed in the computer.
3. To run the project, git repository must be pulled from github
4. Running the main.py should execute the project and start a gui window.
